

Clean Ones In The News

Private Label Buyer – January 2009 Household Gloves

Clean Ones' Cross Wave latex household gloves offer better gripping power and greater gripping surface coverage than traditional latex gloves. The gloves' wider cuff makes it easier to put them on and take them off, and enhances their drip-catching performance. The gloves provide a superior fit, as the slightly larger structure better matches consumer demand and eliminates the need for size XL, which takes up valuable SKU space. Packaged options include one pair of 13-in long latex household gloves, one pair of 12-in regular latex household gloves and two pairs of 12-in regular latex household gloves.
